Directors' Responsibilities and Approval

The directors are required in terms of the International Business Companies Act of 2016 to maintain adequate accounting records and are responsible for the content and integrity of the audited financial statements and related financial information included in this report. It is their responsibility to ensure that the audited financial statements fairly present the state of affairs of the group as at the end of the financial 6 month period and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards. The external auditors are engaged to express an independent opinion on the audited financial statements.

The audited financial statements are prepared in accordance with International Financial Reporting Standards and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the group and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the directors set standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the group and all employees are required to maintain the highest ethical standards in ensuring the group's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the group is on identifying, assessing, managing and monitoring all known forms of risk across the group. While operating risk cannot be fully eliminated, the group endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

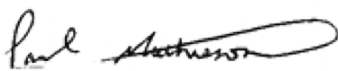

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the audited financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the group's cash flow forecast for the 6 month period to 31 December 2021 and, in light of this review and the current financial position, they are satisfied that the group has or had access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently auditing and reporting on the group's audited financial statements. The audited financial statements have been examined by the group's external auditors and their report is presented on pages 7 to 6.

The audited financial statements set out on pages 7 to 34, which have been prepared on the going concern basis, were approved by the directors on 25 September 2020 and were signed by:

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Directors' Report

The directors have pleasure in submitting their report on the audited financial statements of Investment Evolution Corporation and its Subsidiaries for the 6 month period ended 30 June 2020.

1. Incorporation

The company was incorporated on 08 January 2020 and obtained its certificate to commence business on the same day.

2. Nature of business

Investment Evolution Corporation and its Subsidiaries is an investment entity incorporated in Seychelles with interests in the consumer finance industry. The company does not trade, and all of its activities are undertaken through its principal subsidiaries. The group operates in Seychelles, North America and Europe.

Investment Evolution Corporation was established in the Seychelles under the IBC Act, to hold and facilitate investments in the consumer finance industry and acts as the ultimate holding company. The Company was publicly listed on MERJ Exchange Limited in February 2020.

Investment Evolution Ltd. acts as a holding company and holds the shares of the United States operating business, Investment Evolution Corporation (USA) and Lithuanian company Investment Evolution UAB.

Investment Evolution Corporation (USA) is a fintech company that provides \$5,000 and \$10,000 unsecured consumer loans in the United States and trades under the name "Mr. Amazing Loans". Mr. Amazing Loans has been operating in the United States since 2010 and holds 10 US state lending licenses and/or certificates of authority in California, Florida, Georgia, Illinois, Louisiana, New Jersey, Nevada, Pennsylvania, Texas and Utah.

Investment Evolution UAB was incorporated on 17th April 2020 and added to the Public List of Consumer Credit Providers on 20th July 2020. The Lithuanian company has no operations to date with no plans to commence operations in 2020.

3. Review of financial results and activities

The consolidated audited financial statements have been prepared in accordance with International Financial Reporting Standards and the requirements of the International Business Companies Act of 2016.

Full details of the financial position, results of operations and cash flows of the group are set out in these consolidated audited financial statements.

4. Share capital

Authorised		2020
		Number of shares
Ordinary shares		200 000 000
Issued	2020	2020
	€	Number of shares
Ordinary shares	10 348	103 476 972

Refer to note 8 of the consolidated financial statements for detail of the movement in authorised and issued share capital.

5. Dividends

The directors do not recommend the declaration of a dividend for the 6 month period.

Directors' Report

6. Directorate

The directors in office at the date of this report are as follows:

Directors	Office	Designation	Nationality	Changes
Paul Jason Mathieson	Chairperson	Executive	Australian	Appointed Wednesday, 08 January 2020
Sameer Prasad	Chief Executive Officer	Executive	Australian	Appointed Wednesday, 08 January 2020
Andrew Cassar	Chief Financial Officer	Executive	Maltese	Appointed Wednesday, 08 January 2020
Glendys Aguilera	Director	Executive	American	Appointed Monday, 08 June 2020

7. Directors' interests in shares

As at 30 June 2020, the directors of the company held direct beneficial interests in 44% of its issued ordinary shares, as set out below.

Interests in shares

Directors	2020
	Direct
Paul Jason Mathieson	36 224 785
Sameer Prasad	9 714 030
	<hr/>
	45 938 815

8. Directors' interests in contracts

During the financial year, no contracts were entered into which directors or officers of the group had an interest and which significantly affected the business of the group.

9. Interests in subsidiaries, associates and joint arrangements

Details of material interests in subsidiary companies, associates and joint arrangements are presented in the consolidated audited financial statements in notes 5.

The interest of the group in the profits and losses of its subsidiaries for the 6 month period ended 30 June 2020 is as follows:

	2020
	€
Subsidiaries	
Total losses before income tax	<hr/> (700 252)

The group acquired 100% interest in Investment Evolution Ltd. during the current 6 month period for a consideration of €1 200. Investment Evolution Ltd. acts as a holding company and holds the shares of the United States operating business, Investment Evolution Corporation (USA) and Lithuanian company Investment Evolution UAB.

10. Events after the reporting period

On 20th July 2020, Lithuanian subsidiary Investment Evolution UAB was approved by the Bank of Lithuania to be added to the Public List of Consumer Credit Providers in Lithuania.

The directors are not aware of any other material event which occurred after the reporting date and up to the date of this report.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Directors' Report

11. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

During January 2020 the World Health Organisation declared the COVID 19 virus an international pandemic. The virus spread throughout the world with stock market crashes identified during the beginning of March 2020. During the end of March 2020 multiple countries including Seychelles, Mauritius, the United States of America, most European countries, South Africa and numerous other countries went into national government enforced shut down, lockdown restrictions have eased over the months but there are currently still various limitations in place on trade and travel around the world. These lock downs will put significant strain on the world economy and on companies world-wide. This could lead to an international recession and may cause strain on the company's ability to gain financing and its operations.

All Group business remains 100% operational with all staff working remotely. The Group was already established and operating online with all systems, applications and files in the cloud so was able to easily transition to a fully remote workforce with zero disruption to business. US subsidiary Investment Evolution Corporation DBA Mr. Amazing Loans has so far seen only minor increases in loan arrears due to the crisis, and to date have had no additional loan losses due to COVID-19.

12. Secretary

The company secretary is Mr Andrew Cassar.

13. Terms of appointment of the auditors

PKF Octagon Inc were appointed as the company's auditors.

Independent Auditor's Report

To the shareholders of Investment Evolution Corporation and its subsidiaries

Report on the Audit of the consolidated and separate financial statements

Opinion

We have audited the consolidated and separate financial statements of Investment Evolution Corporation and its subsidiaries (the group) set out on pages 7 to 34, which comprise the consolidated and separate statement of financial position as at 30 June 2020, and the consolidated and separate statement of profit or loss and other comprehensive income, consolidated and separate statement of changes in equity and consolidated and separate statement of cash flows for the year then ended, and notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the financial position of Investment Evolution Corporation and its Subsidiaries as at 30 June 2020, and its consolidated and separate financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Seychelles Companies Ordinance of 1972.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the consolidated and separate financial statements section of our report. We are independent of the company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (Parts 1 and 3) (IESBA Code) and other independence requirements applicable to performing audits of consolidated and separate financial statements in Seychelles. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and in accordance with other ethical requirements applicable to performing audits in Seychelles. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

We draw attention to Note 24 to the consolidated and separate financial statements which deals with the going concern event after the reporting period and specifically the possible effect of the future implications of COVID-19 on the company and group. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How the matter was addressed in the audit
<p>Assessing expected credit risk for Financial assets at amortised cost in terms of IFRS 9.</p> <p>The application of IFRS 9 is considered to be a key audit matter, as it is a standard that requires a significant degree of judgement by management when assessing the impairment of financial instruments. These judgements include amongst others, the classification of financial instruments, the stages in the impairment model in which the financial instruments is classified,</p>	<p>In assessing the impairments, we performed the following procedures, amongst others:</p> <ul style="list-style-type: none"> We assessed the modelling technique and methodology against the requirements of IFRS 9; We assessed the data used in determining the expected credit loss reserve for accuracy;

PKF Octagon Inc. is a member firm of the PKF South Africa Inc. and PKF International Limited family of legally independent firms. Neither PKF Octagon Inc. nor PKF South Africa Inc. accept any responsibility or liability for the actions or inactions on the part of any other individual member or correspondent firm or firms.

defining default and estimating expected credit losses.

The general approach was applied for the loans to individuals and third parties. As described in the notes to the financial statements the credit losses have been determined in accordance with IFRS 9 – Financial Instruments

- We developed our own independent model and assessed the reasonability of management's definition of default and staging of their financial assets for impairment by taking into account various factors. We assessed the forward looking assumptions applied by management in their expected credit loss calculations through discussions with them and corroborated certain assumptions by comparing to underlying assets under management.

We also focussed on the adequacy of the disclosure in the financial statements in terms of IFRS 9 – Financial instruments.

Other information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Investment Evolution Corporation and its Subsidiaries consolidated and separate financial statements for the year ended 30 June 2020", which includes the Directors' Report as required by the Seychelles Companies Ordinance of 1972 and the Detailed Income Statement, which we obtained prior to the date of this report. The other information does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Seychelles Companies Ordinance of 1972, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error. In preparing the consolidated and separate financial statements, the directors are responsible for assessing the group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or to cease operations, or have no realistic alternative but to do so.

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the

date of our auditor's report. However, future events or conditions may cause the group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated and separate financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

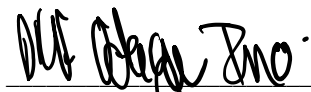

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

We report that this is the first year that PKF Octagon Inc has been auditors of Investment Evolution Corporation.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Accounting Policies

Corporate information

Investment Evolution Corporation and its Subsidiaries is a public limited company incorporated and domiciled in Seychelles.

The consolidated and separate audited financial statements for the 6 month period ended 30 June 2020 were authorised for issue in accordance with a resolution of the directors on Friday, 25 September 2020.

1. Significant accounting policies

The principal accounting policies applied in the preparation of these consolidated and separate audited financial statements are set out below.

1.1 Basis of preparation

The consolidated and separate audited financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective at the time of preparing these audited financial statements and the International Business Companies Act of 2016.

The audited financial statements have been prepared on the historic cost convention, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below. They are presented in Euros, which is the group and company's functional currency.

1.2 Consolidation

Basis of consolidation

The consolidated audited financial statements incorporate the audited financial statements of the company and all subsidiaries. Subsidiaries are entities (including structured entities) which are controlled by the group.

The group has control of an entity when it is exposed to or has rights to variable returns from involvement with the entity and it has the ability to affect those returns through use its power over the entity.

The results of subsidiaries are included in the consolidated audited financial statements from the effective date of acquisition to the effective date of disposal.

Adjustments are made when necessary to the audited financial statements of subsidiaries to bring their accounting policies in line with those of the group.

All inter-company transactions, balances, and unrealised gains on transactions between group companies are eliminated in full on consolidation. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Non-controlling interests in the net assets of consolidated subsidiaries are identified and recognised separately from the group's interest therein, and are recognised within equity. Losses of subsidiaries attributable to non-controlling interests are allocated to the non-controlling interest even if this results in a debit balance being recognised for non-controlling interest.

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions and are recognised directly in the Statement of Changes in Equity.

The difference between the fair value of consideration paid or received and the movement in non-controlling interest for such transactions is recognised in equity attributable to the owners of the company.

Business combinations

The group accounts for business combinations using the acquisition method of accounting. The cost of the business combination is measured as the aggregate of the fair values of assets given, liabilities incurred or assumed and equity instruments issued. Costs directly attributable to the business combination are expensed as incurred, except the costs to issue debt which are amortised as part of the effective interest and costs to issue equity which are included in equity.

Any contingent consideration is included in the cost of the business combination at fair value as at the date of acquisition. Subsequent changes to the assets, liability or equity which arise as a result of the contingent consideration are not affected against goodwill, unless they are valid measurement period adjustments. Otherwise, all subsequent changes to the fair value of contingent consideration that is deemed to be an asset or liability is recognised in either profit or loss or in other comprehensive income, in accordance with relevant IFRS's. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Accounting Policies

1.2 Consolidation (continued)

The acquiree's identifiable assets, liabilities and contingent liabilities which meet the recognition conditions of IFRS 3 Business combinations are recognised at their fair values at acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 Non-current assets Held For Sale and Discontinued Operations, which are recognised at fair value less costs to sell.

Contingent liabilities are only included in the identifiable assets and liabilities of the acquiree where there is a present obligation at acquisition date.

On acquisition, the acquiree's assets and liabilities are reassessed in terms of classification and are reclassified where the classification is inappropriate for group purposes. This excludes lease agreements and insurance contracts, whose classification remains as per their inception date.

Non-controlling interests in the acquiree are measured on an acquisition-by-acquisition basis either at fair value or at the non-controlling interests' proportionate share in the recognised amounts of the acquiree's identifiable net assets. This treatment applies to non-controlling interests which are present ownership interests, and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation. All other components of non-controlling interests are measured at their acquisition date fair values, unless another measurement basis is required by IFRS's.

In cases where the group held a non-controlling shareholding in the acquiree prior to obtaining control, that interest is measured to fair value as at acquisition date. The measurement to fair value is included in profit or loss for the 6 month period. Where the existing shareholding was classified as an available-for-sale financial asset, the cumulative fair value adjustments recognised previously to other comprehensive income and accumulated in equity are recognised in profit or loss as a reclassification adjustment.

Goodwill is determined as the consideration paid, plus the fair value of any shareholding held prior to obtaining control, plus non-controlling interest and less the fair value of the identifiable assets and liabilities of the acquiree. If, in the case of a bargain purchase, the result of this formula is negative, then the difference is recognised directly in profit or loss.

Goodwill is not amortised but is tested on an annual basis for impairment. If goodwill is assessed to be impaired, that impairment is not subsequently reversed.

Goodwill arising on acquisition of foreign entities is considered an asset of the foreign entity. In such cases the goodwill is translated to the functional currency of the group at the end of each reporting period with the adjustment recognised in equity through to other comprehensive income.

1.3 Significant judgements and sources of estimation uncertainty

The preparation of audited financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. For details of the key assumptions and inputs used, refer to the individual notes addressing financial assets.

Impairment testing

The group reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. When such indicators exist, management determine the recoverable amount by performing value in use and fair value calculations. These calculations require the use of estimates and assumptions. When it is not possible to determine the recoverable amount for an individual asset, management assesses the recoverable amount for the cash generating unit to which the asset belongs.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Useful lives of property, plant and equipment

Management assess the appropriateness of the useful lives of property, plant and equipment at the end of each reporting period. The useful lives of motor vehicles, furniture and computer equipment are determined based on group replacement policies for the various assets. Individual assets within these classes, which have a significant carrying amount are assessed separately to consider whether replacement will be necessary outside of normal replacement parameters. The useful life of manufacturing equipment is assessed annually based on factors including wear and tear, technological obsolescence and usage requirements.

When the estimated useful life of an asset differs from previous estimates, the change is applied prospectively in the determination of the depreciation charge.

1.4 Property, plant and equipment

Property, plant and equipment are tangible assets which the group holds for its own use or for rental to others and which are expected to be used for more than one 6 month period.

An item of property, plant and equipment is recognised as an asset when it is probable that future economic benefits associated with the item will flow to the group, and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset, including the capitalisation of borrowing costs on qualifying assets and adjustments in respect of hedge accounting, where appropriate.

Expenditure incurred subsequently for major services, additions to or replacements of parts of property, plant and equipment are capitalised if it is probable that future economic benefits associated with the expenditure will flow to the group and the cost can be measured reliably. Day to day servicing costs are included in profit or loss in the 6 month period in which they are incurred.

Property, plant and equipment is subsequently stated at cost less accumulated depreciation and any accumulated impairment losses, except for land which is stated at cost less any accumulated impairment losses.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is charged to write off the asset's carrying amount over its estimated useful life to its estimated residual value, using a method that best reflects the pattern in which the asset's economic benefits are consumed by the group. Leased assets are depreciated in a consistent manner over the shorter of their expected useful lives and the lease term. Depreciation is not charged to an asset if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Furniture and fixtures	Straight line	5 - 8 years
IT equipment	Straight line	5 years
Leasehold improvements	Straight line	5 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting 6 month period. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each 6 month period is recognised in profit or loss unless it is included in the carrying amount of another asset.

Impairment tests are performed on property, plant and equipment when there is an indicator that they may be impaired. When the carrying amount of an item of property, plant and equipment is assessed to be higher than the estimated recoverable amount, an impairment loss is recognised immediately in profit or loss to bring the carrying amount in line with the recoverable amount.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Accounting Policies

1.4 Property, plant and equipment (continued)

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property, plant and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

1.5 Investments in subsidiaries

Investments in subsidiaries are carried at fair value with fair value changes recognised in profit or loss.

1.6 Financial instruments

Financial instruments held by the group are classified in accordance with the provisions of IFRS 9 Financial Instruments.

Broadly, the classification possibilities, which are adopted by the group, as applicable, are as follows:

Financial assets which are equity instruments:

- Mandatorily at fair value through profit or loss; or
- Designated as at fair value through other comprehensive income. (This designation is not available to equity instruments which are held for trading or which are contingent consideration in a business combination).

Financial assets which are debt instruments:

- Amortised cost. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is met by holding the instrument to collect contractual cash flows); or
- Fair value through other comprehensive income. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is achieved by both collecting contractual cash flows and selling the instruments); or
- Mandatorily at fair value through profit or loss. (This classification automatically applies to all debt instruments which do not qualify as at amortised cost or at fair value through other comprehensive income); or
- Designated at fair value through profit or loss. (This classification option can only be applied when it eliminates or significantly reduces an accounting mismatch).

Derivatives which are not part of a hedging relationship:

- Mandatorily at fair value through profit or loss.

Financial liabilities:

- Amortised cost; or
- Mandatorily at fair value through profit or loss. (This applies to contingent consideration in a business combination or to liabilities which are held for trading); or
- Designated at fair value through profit or loss. (This classification option can be applied when it eliminates or significantly reduces an accounting mismatch; the liability forms part of a group of financial instruments managed on a fair value basis; or it forms part of a contract containing an embedded derivative and the entire contract is designated as at fair value through profit or loss).

Note 23 Financial instruments and risk management presents the financial instruments held by the group based on their specific classifications.

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

The specific accounting policies for the classification, recognition and measurement of each type of financial instrument held by the group are presented below:

Investment Evolution Corporation and its Subsidiaries

Accounting Policies

1.6 Financial instruments (continued)

Trade and other receivables

Classification

Trade and other receivables, excluding, when applicable, VAT and prepayments, are classified as financial assets subsequently measured at amortised cost (note 6).

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the group's business model is to collect the contractual cash flows on trade and other receivables.

Recognition and measurement

Trade and other receivables are recognised when the group becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the receivable initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

Application of the effective interest method

For receivables which contain a significant financing component, interest income is calculated using the effective interest method, and is included in profit or loss in investment income (note 15).

The application of the effective interest method to calculate interest income on trade receivables is dependent on the credit risk of the receivable as follows:

- The effective interest rate is applied to the gross carrying amount of the receivable, provided the receivable is not credit impaired. The gross carrying amount is the amortised cost before adjusting for a loss allowance.
- If a receivable is a purchased or originated as credit-impaired, then a credit-adjusted effective interest rate is applied to the amortised cost in the determination of interest. This treatment does not change over the life of the receivable, even if it is no longer credit-impaired.
- If a receivable was not purchased or originally credit-impaired, but it has subsequently become credit-impaired, then the effective interest rate is applied to the amortised cost of the receivable in the determination of interest. If, in subsequent periods, the receivable is no longer credit impaired, then the interest calculation reverts to applying the effective interest rate to the gross carrying amount.

Impairment

The group recognises a loss allowance for expected credit losses on trade and other receivables, excluding VAT and prepayments. The amount of expected credit losses is updated at each reporting date.

The group measures the loss allowance for trade and other receivables at an amount equal to lifetime expected credit losses (lifetime ECL), which represents the expected credit losses that will result from all possible default events over the expected life of the receivable.

Measurement and recognition of expected credit losses

The group makes use of a provision matrix as a practical expedient to the determination of expected credit losses on trade and other receivables. The provision matrix is based on historic credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current and forecast direction of conditions at the reporting date, including the time value of money, where appropriate.

The customer base is widespread and does not show significantly different loss patterns for different customer segments. The loss allowance is calculated on a collective basis for all trade and other receivables in totality. Details of the provision matrix is presented in note 6.

An impairment gain or loss is recognised in profit or loss with a corresponding adjustment to the carrying amount of trade and other receivables, through use of a loss allowance account. The impairment loss is included in other operating expenses in profit or loss as a movement in credit loss allowance (note 18).

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Accounting Policies

1.6 Financial instruments (continued)

Write off policy

The group writes off a receivable when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Receivables written off may still be subject to enforcement activities under the group recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

Credit risk

Details of credit risk are included in the trade and other receivables note (note 6) and the financial instruments and risk management note (note 23).

Derecognition

Refer to the derecognition section of the accounting policy for the policies and processes related to derecognition.

Borrowings and loans from related parties

Classification

Loans from group companies (note 11), loans from directors (note 13) and borrowings (note 14) are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

Borrowings and loans from related parties are recognised when the group becomes a party to the contractual provisions of the loan. The loans are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Interest expense, calculated on the effective interest method, is included in profit or loss in finance costs (note 19.)

Borrowings expose the group to liquidity risk and interest rate risk. Refer to note 23 for details of risk exposure and management thereof.

Loans denominated in foreign currencies

When borrowings are denominated in a foreign currency, the carrying amount of the loan is determined in the foreign currency. The carrying amount is then translated to the Euro equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating gains (losses) (note 17).

Details of foreign currency risk exposure and the management thereof are provided in the specific loan notes and in the financial instruments and risk management (note 23).

Derecognition

Refer to the derecognition section of the accounting policy for the policies and processes related to derecognition.

Accounting Policies

1.6 Financial instruments (continued)

Trade and other payables

Classification

Trade and other payables (note 12), excluding VAT and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

They are recognised when the group becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance costs (note 19).

Trade and other payables expose the group to liquidity risk and possibly to interest rate risk. Refer to note 23 for details of risk exposure and management thereof.

Trade and other payables denominated in foreign currencies

When trade payables are denominated in a foreign currency, the carrying amount of the payables are determined in the foreign currency. The carrying amount is then translated to the Euro equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating gains (losses) (note 17).

Derecognition

Financial assets

The group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the group retains substantially all the risks and rewards of ownership of a transferred financial asset, the group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The group derecognises financial liabilities when, and only when, the group obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Accounting Policies

1.7 Tax

Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company generates taxable income.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

1.8 Impairment of assets

The group assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the group estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the group also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.
- tests goodwill acquired in a business combination for impairment annually.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation other than goodwill is recognised immediately in profit or loss. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Accounting Policies

1.9 Share capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Ordinary shares are recognised at par value and classified as 'share capital' in equity. Any amounts received from the issue of shares in excess of par value is classified as 'share premium' in equity. Dividends are recognised as a liability in the group in which they are declared.

1.10 Revenue from contracts with customers

The group recognises revenue from the following major sources:

- Interest on loans to consumers

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The group recognises revenue when it transfers control of a product or service to a customer.

Identifying performance obligations

The Group earns fees and interest from its customers. The Group determined that these revenue streams are capable of being distinct and are not highly interdependent.

Determining timing of satisfaction

The Group concluded that revenue is to be recognised at a point in time. For invoiced services, revenue is recognized as the related services are performed. For interest income, interest revenue is calculated using the interest yield method. Charges for late payments are credited to income when collected.

Accrual of interest income on loans receivable is suspended when no payment has been received on account for 91 days or more on a contractual basis, at which time a loan is considered delinquent. Payments received on nonaccrual financing loans are first applied to the unpaid accrued interest and then principal. Loans are returned to active status and accrual of interest income is resumed when all the principal and interest amounts contractually due are brought current, at which time management believes future payments are reasonably assured.

1.11 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the entity on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when:

- expenditures for the asset have occurred;
- borrowing costs have been incurred, and
- activities that are necessary to prepare the asset for its intended use or sale are in progress.

Capitalisation is suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.12 Translation of foreign currencies

Functional and presentation currency

Items included in the audited financial statements of each of the group entities are measured using the currency of the primary economic environment in which the entity operates (functional currency).

The consolidated audited financial statements are presented in Euro which is the group functional and presentation currency.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Accounting Policies

1.12 Translation of foreign currencies (continued)

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Euros, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

In circumstances where the group receives or pays an amount in foreign currency in advance of a transaction, the transaction date for purposes of determining the exchange rate to use on initial recognition of the related asset, income or expense is the date on which the group initially recognised the non-monetary item arising on payment or receipt of the advance consideration.

If there are multiple payments or receipts in advance, group determines a date of transaction for each payment or receipt of advance consideration.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous audited financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Euros by applying to the foreign currency amount the exchange rate between the Euro and the foreign currency at the date of the cash flow.

Investments in subsidiaries, joint ventures and associates

The results and financial position of a foreign operation are translated into the functional currency using the following procedures:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position; and
- income and expenses for each item of profit or loss are translated at exchange rates at the dates of the transactions.

Exchange differences arising on a monetary item that forms part of a net investment in a foreign operation are recognised initially to other comprehensive income and accumulated in the translation reserve. They are recognised in profit or loss as a reclassification adjustment through to other comprehensive income on disposal of net investment.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of that foreign operation are treated as assets and liabilities of the foreign operation.

The cash flows of a foreign subsidiary are translated at the exchange rates between the functional currency and the foreign currency at the dates of the cash flows.

Audited Financial Statements for the 6 month period ended 30 June 2020

Notes to the Audited Financial Statements

2. New Standards and Interpretations

2.1 Standards and interpretations effective and adopted in the current 6 month period

In the current 6 month period, the group has adopted the following standards and interpretations that are effective for the current financial 6 month period and that are relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Plan Amendment, Curtailment or Settlement - Amendments to IAS 19	01 January 2019	Unlikely there will be a material impact
• Prepayment Features with Negative Compensation - Amendment to IFRS 9	01 January 2019	Unlikely there will be a material impact
• Amendments to IFRS 3 Business Combinations: Annual Improvements to IFRS 2015 - 2017 cycle	01 January 2019	Unlikely there will be a material impact
• Amendments to IAS 12 Income Taxes: Annual Improvements to IFRS 2015 - 2017 cycle	01 January 2019	Unlikely there will be a material impact
• Amendments to IAS 23 Borrowing Costs: Annual Improvements to IFRS 2015 - 2017 cycle	01 January 2019	Unlikely there will be a material impact
• IFRS 16 Leases	01 January 2019	The impact of the amendments is not material.

2.2 Standards and interpretations not yet effective

The group has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the group's accounting periods beginning on or after 01 January 2021 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	Effective date still to be determined	Unlikely there will be a material impact
• IFRS 17 Insurance Contracts	01 January 2021	Unlikely there will be a material impact

The aggregate impact of the initial application of the statements and interpretations on the group's audited financial statements is expected to be as follows:

3. Earnings per share

Earnings and headline earnings per share are calculated using the weighted average number of relevant ordinary shares in issue during the year. The weighted average number of shares in issue during the year for both basic earnings per share and diluted earnings per share at 30 June 2020:

Number of shares in issue excluding treasury shares: 103 476 972

Weighted number of shares: 83 039 290

Basic earnings: 470 742

The entity has no reason to exclude any amounts from basic earnings per share. The basic and diluted earnings per share as at 30 June 2020 was €0.005669.

Exposure to credit risk

Trade receivables inherently expose the group to credit risk, being the risk that the group will incur financial loss if customers fail to make payments as they fall due.

In order to mitigate the risk of financial loss from defaults, each customer is analysed individually for creditworthiness before terms and conditions are offered. Statistical credit scoring models are used to analyse customers. These models make use of information submitted by the customers as well as external bureau data (where available). The exposure to credit risk and the creditworthiness of customers, is continuously monitored.

The group measures the loss allowance for trade receivables by applying the simplified approach which is prescribed by IFRS 9. In accordance with this approach, the loss allowance on trade receivables is determined as the lifetime expected credit losses on trade receivables. These lifetime expected credit losses are estimated using a provision matrix, which is presented below. The provision matrix has been developed by making use of past default experience of debtors but also incorporates forward looking information and general economic conditions of the industry as at the reporting date.

The loans receivable has been assessed for expected credit losses in terms of IFRS9. For each loan receivable, management took into consideration the following:

Probability of default (PD) – this is the likelihood that the debtor will default on its debts (goes bankrupt or so) within certain period (12 months for loans in Stage 1 and lifetime for other loans).

Loss given default (LGD) – this is the percentage that the Group can lose when the debtor defaults.

Exposure at default (EAD) – this is the carrying amount of the receivable at the time of default.

Any expected credit losses were discounted in terms of the effective interest rate of the loan.

Exposure to currency risk

The net carrying amounts, in Euro, of trade and other receivables, excluding non-financial instruments, are denominated in the following currencies. The amounts have been presented in Euro by converting the foreign currency amount at the closing rate at the reporting date.

During the 6 month period, the company repurchased 2,523,028 shares through an on-market share buyback.

Ordinary shares have a par value of EUR0.0001. They entitle the holder to participate in dividends, and to share in the proceeds of winding up the company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting, in person or by proxy, is entitled to one vote, and on a poll each share is entitled to one vote.

9. Share premium

On the 7th February 2020 Investment Evolution Corporation (MERJ: IEC) listed 100% of its 106 million ordinary shares on the MERJ Exchange Limited, a Seychelles stock exchange, at EUR0.15 per share, equating to an initial market capitalisation of EUR15.9 million.

Between March and June 2020, there were share buy backs from Investment Evolution Corporation with the difference between par value and the market value of the shares accounted for in the share premium.

23. Financial instruments and risk management (continued)

Capital risk management

The group's objective when managing capital (which includes share capital, borrowings, working capital and cash and cash equivalents) is to maintain a flexible capital structure that reduces the cost of capital to an acceptable level of risk and to safeguard the group's ability to continue as a going concern while taking advantage of strategic opportunities in order to maximise stakeholder returns sustainably.

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for its shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt.

The capital structure and gearing ratio of the group at the reporting date was as follows:

Loans from group companies	11	-	403 722
Loans from directors	13	672 000	-
Borrowings	14	520 000	-
Trade and other payables	12	44 379	645

23. Financial instruments and risk management (continued)

Financial risk management

Overview

The group is exposed to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk (currency risk, interest rate risk and price risk).

The group's risk management policies are established to identify and analyse the risks faced by the group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the group's activities.

Credit risk

Credit risk is the risk of financial loss to the group if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The group is exposed to credit risk on loans receivable, trade and other receivables, contract receivables, cash and cash equivalents, and loan commitments.

Credit risk for exposures other than those arising on cash and cash equivalents, are managed by making use of credit approvals, limits and monitoring. Each counterparty is analysed individually for creditworthiness before terms and conditions are offered. The analysis involves making use of information submitted by the counterparties as well as external bureau data (where available). Counterparty credit limits are in place and are reviewed and approved by credit management committees. The exposure to credit risk and the creditworthiness of counterparties is continuously monitored.

Credit risk exposure arising on cash and cash equivalents is managed by the group through dealing with well-established financial institutions with high credit ratings.

In order to calculate credit loss allowances, management determine whether the loss allowances should be calculated on a 12 month or on a lifetime expected credit loss basis. This determination depends on whether there has been a significant increase in the credit risk since initial recognition. If there has been a significant increase in credit risk, then the loss allowance is calculated based on lifetime expected credit losses. If not, then the loss allowance is based on 12 month expected credit losses. This determination is made at the end of each financial period. Thus the basis of the loss allowance for a specific financial asset could change year on year.

Where necessary, the assessment for a significant increase in credit risk is made on a collective basis. Management typically adopt this approach when information relevant to the determination of credit risk is not available on an individual instrument level. Often, the only information available on individual instruments which could indicate an increase in credit risk, is "past due" information. It is typical that more forward-looking information is generally more readily available on a collective basis. Therefore, making the determination on a collective basis, helps to ensure that credit loss allowances are determined on the basis of lifetime expected credit losses before they reach the point of being past due. Forward looking, macro-economic information is applied on a collective basis when it is readily available without undue cost or effort. When loss allowances are determined on a collective basis, management determines the loss allowances by grouping financial instruments on the basis of shared credit risk characteristics.

For trade receivables and contract assets which do not contain a significant financing component, the loss allowance is determined as the lifetime expected credit losses of the instruments. For all other trade receivables, contract assets and lease receivables, IFRS 9 permits the determination of the credit loss allowance by either determining whether there was a significant increase in credit risk since initial recognition or by always making use of lifetime expected credit losses. Management have chosen as an accounting policy, to make use of lifetime expected credit losses. Management does therefore not make the annual assessment of whether the credit risk has increased significantly since initial recognition for trade receivables, contract assets or lease receivables.

Investment Evolution Corporation and its Subsidiaries

(Registration number 217938)

Audited Financial Statements for the 6 month period ended 30 June 2020

Notes to the Audited Financial Statements

23. Financial instruments and risk management (continued)

The maximum exposure to credit risk is presented in the table below:

Group	2020		
	Gross carrying amount	Credit loss allowance	Amortised cost / fair value
Loans to group companies	806 460	-	806 460
Trade and other receivables	1 240 254	(245 911)	994 343
Cash and cash equivalents	328 444	-	328 444
	2 375 158	(245 911)	2 129 247

Company	2020		
	Gross carrying amount	Credit loss allowance	Amortised cost / fair value
Cash and cash equivalents	17 117	-	17 117

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Management monitors liquidity risk by means of rolling forecasts on the basis of expected cash flows over a twelvemonth period and ensures that no additional financing facilities are expected to be required over the coming period. The Company's liquidity risk is not deemed material in view of the matching of cash inflows and outflows arising from expected maturities of both financial instruments, coupled with the Company's committed borrowing facilities that it can access to meet liquidity needs as referred to previously. The carrying amounts of the Company's assets and liabilities are analysed into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date in the respective notes to the financial statements.

The group manages its liquidity risk by effectively managing its working capital, capital expenditure and cash flows. The financing requirements are met through a mixture of cash generated from operations and long and short term borrowings. Committed borrowing facilities are available for meeting liquidity requirements and deposits are held at central banking institutions.

The table below analyses the company's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Group - 2020

		Carrying amount

		403 722	403 722	404 367

Interest rate risk

Fluctuations in interest rates impact on the value of investments and financing activities, giving rise to interest rate risk.

24. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

During January 2020 the World Health Organisation declared the COVID 19 virus an international pandemic. The virus spread throughout the world with stock market crashes identified during the beginning of March 2020. During the end of March 2020 multiple countries including Seychelles, Mauritius, the United States of America, most European countries, South Africa and numerous other countries went into national government enforced shut down, lockdown restrictions have eased over the months but there are currently still various limitations in place on trade and travel around the world. These lock downs will put significant strain on the world economy and on companies world-wide. This could lead to an international recession and may cause strain on the company's ability to gain financing and its operations.

All Group business remains 100% operational with all staff working remotely. The Group was already established and operating online with all systems, applications and files in the cloud so was able to easily transition to a fully remote workforce with zero disruption to business. US subsidiary Investment Evolution Corporation DBA Mr. Amazing Loans has so far seen only minor increases in loan arrears due to the crisis, and to date have had no additional loan losses due to COVID-19

25. Events after the reporting period

On 20th July 2020, Lithuanian subsidiary Investment Evolution UAB was approved by the Bank of Lithuania to be added to the Public List of Consumer Credit Providers in Lithuania.

The directors are not aware of any other material event which occurred after the reporting date and up to the date of the financial statements.
